

Warehousing Solutions

Impact Supply Chain Solutions offers a complete menu of warehousing solutions ranging from cross-dock operations to inventory and pick-and-pack services. Our warehousing services are completely integrated with our menu of freight forwarding solutions giving you complete control of your inventory and outbound operations. Simply pull inventory off our secure, on-line warehouse management system and ship to destination using our menu of domestic and international services.

Services include:

- Shipping documents (air waybill, SLI or bill of lading) created online automatically when inventory is selected to ship
- Ability to print shipping labels and packing slips online
- Customized labels and packaging configuration per consignee specifications
- Strategically located warehouse sites positioning you to shorten turn-around times and minimize handling. Most deliveries are next day
- Temperature controlled and fully insured facilities. Bonded facilities available upon request
- Reduce the need for fixed assets, and fixed costs, by paying only for the space and services used. Perfect for cyclical business trends
- Single, streamlined invoicing for warehousing and shipping services
- Special handling with varying degrees of pick & pack and order fulfillment services available for virtually any need
- Real time, computerized inventory control
- Order tracking from inception through to final delivery 24/7

For complete turn-key warehousing solutions, let the team at Impact Supply Chain Solutions make a positive impact
